WARREN AXE & TOOL CO.
WARREN • PENNSYLVANIA

• I N T R O D U C T O R Y •

In presenting this catalog, the Warren Axe & Tool Company would call your attention to the fact that we are constantly on the alert to improve, wherever possible, the quality of our product. We have adopted the latest approved, electrically-controlled equipment for tempering axes, and have recently installed other special heat-treating equipment which enables us to produce a better product than ever before.

Over forty years of a highly successful and steadily increasing business is the best proof and strongest confirmation of the high grade and sterling qualities of our SAGER SPECIAL CHEMICAL PROCESS brand of axes and our line of BULL DOG LOGGING TOOLS. The fact, that SAGER AXES and BULL DOG LOGGING TOOLS are manufactured from the best materials obtainable, by workmen highly skilled in these special lines, has made these brands the standards in all the principal logging camps.

We are the sole owners of the SAGER PATENT CHEMICAL PROCESS for treating metals, as per letters patent. The best grade steel is used exclusively in our highest-grade axes and branded SAGER SPECIAL CHEMICAL PROCESS. Our BULL DOG LOGGING TOOL BRAND is protected by U. S. copyright. Any infringements on our patents or copyrights will be promptly prosecuted.

A X E S

Our factory capacity is 3000 Hand Forged Axes daily, which insures prompt deliveries.

Our axes are HAND FORGED, which enables us to work the steel more thoroughly, thereby making it tougher than is possible by other processes used by some manufacturers to lessen cost.

In addition to the SAGER AXE and our regular factory brands, we manufacture axes for hundreds of the most particular jobbers in the country under their own private brands, in both single and double bits, in all patterns, weights, and finishes.

Our constant motto is "*Not how cheap,*" but "*How good.*" We cater only to the trade demanding *highest quality.*

THE SAGER PATENT CHEMICAL PROCESS AXE

Why is this axe demanded in all sections of the United States by the largest and most particular lumber operators and sold in solid car-lots to the large wholesale hardware trade?

The reasons are simple enough:

HAND FORGED—This eliminates the possibility of overheating the bit steel, as is often done under the cheaper drop-forging process. A hand-forged tool is always preferred by those demanding an article of quality and merit.

REFINING STEEL—Each Sager Axe receives several hundred blows under the hammer, thereby thoroughly working and refining the steel, which accounts largely for its toughness and ability to stand hard usage. The ordinary axes on the market receive a comparatively small amount of refining, under their cheaper methods of manufacture.

TEMPERING—The Sager Axe is tempered by a process which requires double the time required for ordinary run of product, but when finished it is *right*. The Warren Axe & Tool Company are the exclusive owners of the SAGER PATENT CHEMICAL PROCESS for the treatment of steel. Natural gas is used which gives the most uniform heat for tempering.

COLOR—The natural blue color of the Sager is obtained solely from our special tempering process and insures perfect temper.

INSPECTION—All Sager Axes are carefully inspected in each department and subjected to a rigid test by striking the blade several heavy hammer blows, thereby detecting any imperfections.

MATERIAL—Nothing but the very finest quality of axe bit steel is used in its manufacture.

WARRANTY—All Sager Patent Chemical Process Axes are warranted, and any such truly defective axes will be replaced without charge.

IN SHORT—The Sager Patent Axe is the embodiment of all the skill, care, and life experience of some of the oldest and most prominent axe experts in the country, honestly made, and the quality which we claim is universally recognized.

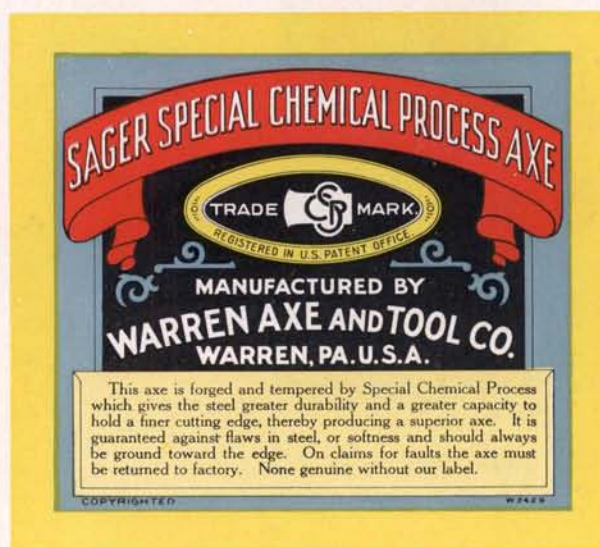

PRICE—Your nearest jobber can furnish the Sager Patent Axe at a price only a little higher than you would have to pay for an inferior product. If your jobber does not sell the Sager Patent Axe, write us and we will see that your wants are supplied.

THE SAGER AXE is manufactured by THE WARREN AXE & TOOL CO., WARREN, PA., and by them only, and has the only Genuine Sager Label copyrighted and owned solely by them. Like all good things it has its imitators.

INSIST ON HAVING THE ONLY GENUINE SAGER AXE WITH THIS LABEL

The GENUINE SAGER AXE is warranted against flaws or any fault of manufacture. This Axe is made from the highest grade STEEL. The bits are forged by HAND and thoroughly HAMMERED—in this way refining the steel as can be done in no other manner, and GROUND before TEMPERING, avoiding all danger of drawing the TEMPER. The COLOR is the NATURAL COLOR just as it comes from the TEMPERER. It is dipped in transparent lacquer to prevent rust, and the color is proof that the axe is of the proper TEMPER. There is nothing covered up by paint or fancy finish—the Axe is just what it appears—the BEST AXE MADE today. Each bit receives individual treatment in forging and tempering to enable it to give most satisfactory service.

THE SAGER BRAND AXE

"MICHIGAN" OR "CROWN" PATTERN

Always specify weight, pattern and brand; also grade and length of handles.

Packed in assorted weights to suit the customer.

These patterns may be had in any of our regular brands and finishes.

These axes are *not* painted. They are dipped in transparent lacquer so every buyer can see for himself that the temper color of each axe shows the axe is properly tempered.

WARREN LOGGING

THE FAMOUS "BULL DOG" LINE

For years past our experts have been studying and perfecting our line until now our *Bull Dog Logging Tools* are famous for their safety, efficiency, strength and durability. Like Warren Axes, they are the product of leading experts in this field, working close to the experience of Loggers and Lumbermen out in the camps.

Many of our tools are protected by patents.

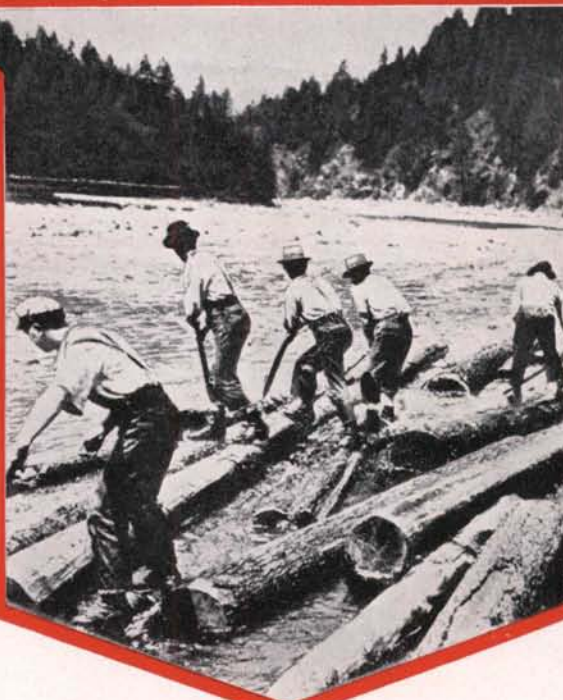

We use the best grade of crucible analysis steel in their manufacture and employ the best skilled workmen, and while we aim to make the highest grade line on the market, regardless of cost of production,

our prices are no higher than those asked by others for the ordinary run of products costing much less to manufacture.

We are constantly adding to our equipment and are always prepared to take care of all orders—large or small—in a prompt and satisfactory manner.

DRIVING OR RAFTING PEAVIES

WITH WROUGHT STEEL SOCKET AND PICK IN ONE PIECE, WITH CLASP

This is a light but strong Peavy. Socket and pick are made of high carbon steel welded in one piece. The clasp is securely fastened, and prevents the socket from slipping, and can be easily replaced if broken. The stocks are turned from the best timber, straight-grained, and air-seasoned.

MILL HOOKS

This is a hook designed especially for mill use, handling ties, square timber, etc. It is made with socket and has a claw instead of toe piece. This is a very strong light tool, and is admirably adapted for the purpose intended. By using two together, they will take the place of a timber carrier. We furnish these only with hickory handles, which is the strongest wood we can obtain. We usually furnish round point hooks on this tool, but we can send any pattern hook wanted.

MILL HOOK HANDLES

These are made from selected hickory and are bored and turned to fit our sockets and claws.

TIMBER CARRIERS OR LUG HOOKS

This tool is for use wherever timber is handled, in lumber yards, around the mill, for handling ties, telegraph poles, etc. It is equipped with the best second-growth maple or hickory handles. The hooks and clasp are forged from high carbon steel with annealed malleable swivel to permit handling timber in narrow places.

Timber Carriers are equipped with forged steel hooks. Our No. 47— $\frac{7}{8}$ " x $\frac{7}{16}$ " Duck Bill or No. 53—chisel point, and will take square timber up to 16".

GRAB MAUL AND SKIPPER, COMBINED WITH BEST 36-INCH HICKORY HANDLE

This is a very useful tool for the lumberman. We make this of high carbon steel with one end drawn out for extracting grabs and the other end flat for driving grabs or sledging.

No.	Weight		Price Per Dozen
1249	5-pound	26" handle	\$25.00
1250	7-pound	36" handle	26.00
1251	12-pound	36" handle	30.00

This tool is made for driving logging dogs, and is the ideal tool for the purpose. The ring is made from mild steel. The steel on this maul is 3" wide by 1" thick. The tool with handle weighs 9½ pounds.

We insert a small pick in the bottom of the handle so that the tool can be stuck in a log to prevent its being mislaid.

BARK SPUD HANDLES

Turned to fit our spuds from selected second-growth timber.

No.		Approx. Wt. (Lbs.) Per Dozen	Price Per Dozen
1192		12	\$3.00

CEDAR SPUDS

Length of spud and socket, 11½ inches. Bit, 4¼ inches wide. Hickory handle, 3½ feet.

For peeling cedar logs. Made from best high carbon steel. Handles are made from selected hickory. We can furnish these in either bent or straight pattern.

PACIFIC COAST SWIVEL (Covered by U. S. Letters Patent)

The Best for hoisting machinery on ships, electric cranes, etc.

It is with the utmost confidence that we offer our new Pacific Coast Swivel, which is easily the king among its class and possesses more desirable points than it seems possible to combine in one small compact, extra strong body. A few points of superiority are as follows:

- 1st—No weak parts.
- 2nd—All parts interchangeable. Admitting of quickly replacing those worn.
- 3rd—Only two-thirds the usual length.
- 4th—Will stand more than double the side strain of other swivels.
- 5th—It is perfectly round and draft strain covers its circle on all sides alike.
- 6th—Has no projecting parts.
- 7th—Is dirt and mud proof.
- 8th—Will hold its oil.
- 9th—Will swivel when drawn hard against any object.
- 10th—Has two draw heads. (Ponder on what this means as its advantages are too numerous to mention.)
- 11th—Will not stick or freeze. (You know what that means.)

12th—Forged from special crucible analysis steel and carefully machined.

In a word it is a swivel made perfect and looks as well as it acts, which means that it is a "beauty." Made in the following sizes and prices:

No.	Length of Swivel	Diameter of Swivel	Weight (Lbs.) Each	Will Take Rope	Breaking Strain	Price Each
0	2 3/4 inches	1 inch	5 oz.	3/8 inch	7130 lbs.	\$1.79
1	2 7/8 inches	1 3/8 inches	10 oz.	7/16 inch	14950 lbs.	2.29
3	4 1/2 inches	2 inches	2 1/4 lbs.	1/2 to 5/8 inch	46000 lbs.	2.71
5	5 inches	2 1/4 inches	3 1/4 lbs.	3/4 to 7/8 inch	72800 lbs.	3.79
10	6 3/8 inches	3 1/4 inches	7 1/4 lbs.	7/8 to 1 1/8 inches	82700 lbs.	5.43
15	8 inches	4 inches	12 1/2 lbs.	1 1/4 inches up	91300 lbs.	9.29

S W I V E L S

We make a full line of forged steel swivels. These are very much stronger than the Malleable Swivels, and cost but a little more. In addition to the sizes mentioned below, we would be pleased to make quotations on any special swivel or other tools desired by the trade.

No.	Size	Approx. Wt. (Lbs.) Per Dozen	Price per Dozen

3/4 inch	6 1/2 x 3 1/8 inches	1 1/8 inch	1 1/4 x 1 1/4 inches	30660 pounds
1 inch	9 x 4 1/2 inches	1 1/8 inch	2 x 2 inches	58960 pounds

CHOKER HOOKS AND LINE HOOKS EQUIPPED WITH PACIFIC COAST SWIVELS

These hooks embrace so many good qualities that we will not undertake to name them all, but submit the following:
 1st—They have the only style of swivel made that swivels under a heavy strain.
 2nd—When properly oiled will swivel when old as well as when first used.

3rd—They have less than half the weight of the ordinary contrivance which embraces a large link and cumbersome non-working swivel.

4th—They save their price many times over in saving on lines and are the greatest logging tool since the advent of the donkey engine.

LINE HOOKS

Same pattern as hook on swivel line hook.

These hooks are all hand forged and are made from the highest grade crucible analysis steel. We make them either in the "Washington" or "Oregon" style. The "Washington" pattern has the eye at right angles to the hook. The "Oregon" pattern has the eye in the same plane as the hook.

WASHINGTON PATTERN

No.	Size	Price Each

We can furnish Cold Shutts with pinched ends, but will always ship plain ends unless otherwise specified.

DROP FORGED CONNECTING OR REPAIR LINKS

This Link is made from a fine grade of forging steel, drop forged, solid and without weld; in all sizes $\frac{1}{4}$ to 1 inch. Made to equal the strain of a chain the same size, and lengths of same dimensions. All links have been subjected to government test, and show a very high tensile strength.

Size Material	Length Inside	Price Per Dozen	Size Material	Length Inside	Price Per Dozen
$\frac{1}{4}$ inch	$\frac{3}{4}$ inch	\$1.25	$\frac{5}{8}$ inch	$1\frac{13}{16}$ inches	\$2.50

IMPROVED BULL DOG PATENT LOGGING DOGS OR LOG GRABS

(COVERED BY LETTERS PATENT)

FORGED FROM HIGHEST QUALITY CRUCIBLE ANALYSIS STEEL

The improved Bull Dog Patent Log Grabs, sometimes called Logging Dogs, or Grab Hooks, as now made by us have no superior. The pattern that we are now putting on the market is the result of the past 20 years of practical experience by practical men right in the woods. We have obtained the ideas of the best loggers in the business and incorporated these ideas in the Bull Dog Grabs as now made by us. Lumbermen in all sections are singing their praises. They are forged from the highest quality crucible analysis steel of the right carbon to be tough but not brittle. These grabs are easily driven and easily extracted, while the name "Bull Dog" explains their tenacity in holding on.

We make these in five sizes as follows:

No. 0 is for pulp wood and small hardwood.

No. 1 is for crotch grabs, ties and hardwood.

No. 2 is for trailing and is also a popular size with many for soft wood.

No. 3 is the large size for hemlock and other soft woods.

No. 6 is for extra large timber of all kinds.

No.	Size	Approx. Weight Per Dozen	Length Overall	Depth of Tooth	Price Per Dozen
277	No. 0	12	6½ inches	2¾ inches	\$4.80
278	No. 1	20	7½ inches	3¼ inches	5.80
279	No. 2	24	7¾ inches	3½ inches	6.50
280	No. 3	27	8 inches	4 inches	7.40
A280	No. 6	42	9½ inches	4½ inches	8.30

Loggers frequently want tools of new or special design. We are exceptionally well equipped for work of this kind, and will be glad at all times to furnish estimates and prices on anything wanted by the trade.

TRAILERS WITH STEEL FORGED SWIVELS

These are made with four links, hand forged from soft steel 5/8-inch in diameter. The swivel is 5/8 inch. The trailer is 18 inches between the grabs. We will use the No. 2 Grab unless otherwise specified. We can furnish this tool with heavier links and swivels at an additional price when so ordered.

No.		Approx. Wt. (Lbs.) Per Dozen	Price Per Dozen
A281	With No. 0 Grabs 1½ inch Links and 1½ inch Swivel.....	60	\$32.20
B281	With No. 1 Grabs 5/8 inch Links and 5/8 inch Swivel.....	90	35.90
281	With No. 2 Grabs 5/8 inch Links and 5/8 inch Swivel.....	105	37.30
C281	With No. 3 Grabs 5/8 inch Links and 5/8 inch Swivel.....	115	38.20

CROTCH GRABS

These are made with 1/2-inch tested chain and 3/4-inch ring, hand forged, from mild steel. We use four hand-forged links to connect grabs and ring with chain. We will furnish with our No. 2 Grab unless otherwise specified. The length of each chain is 19 inches. We can furnish Crotch Grabs in heavier chain and rings at an additional price when so specified.

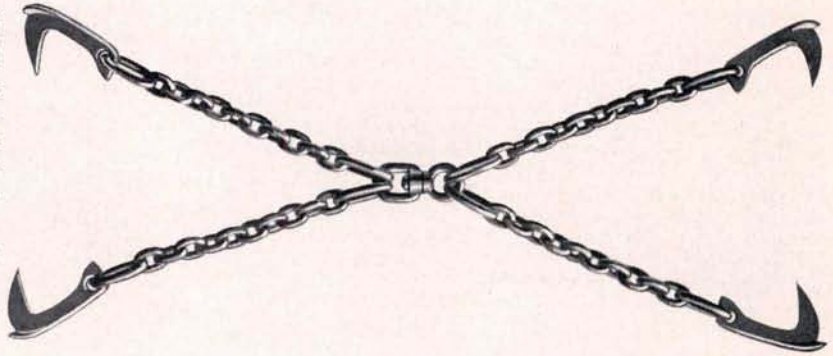

No.	Approx. Wt. (Lbs.) Per Dozen	Price Per Dozen
282	180	\$50.60

FOUR PAW GRABS

This tool is made with forged $\frac{3}{4}$ -inch swivel, $\frac{1}{2}$ -inch links, and $\frac{1}{2}$ -inch chain. The links are hand-forged from mild steel, and the chain is tested. We will equip this tool with our No. 2 Grabs unless otherwise ordered. The length of each chain is 19 inches. We can furnish Four Paw Grabs in heavier swivel, links, and chain when so ordered.

No.	Approx. Wt. (Lbs.) Per Doz.	Price Per Doz.
284	334	\$104.00

CARTING GRABS

Made with $\frac{3}{4}$ -inch forged swivel and hand-forged rings and link with $\frac{1}{2}$ -inch tested chain. We will equip these with No. 2 Bull Dog Grabs unless otherwise specified. Each chain is 19 inches in length. We can furnish these tools with heavier chains, links, and swivels at an additional price when so ordered.

No.	Approx. Wt. (Lbs.) Per Dozen	Price Per Dozen
283	238	\$74.70

WARREN LOAD BINDERS

WITH SPRING

PATENTED

WITHOUT SPRING

As the load settles, the heavy coil spring automatically takes up the slack in the chain. The spring also acts as a *shock absorber*, greatly lessening the strain on the chain and binder. There are two swivels, so that the kinks may easily be taken out of the chain from both ends. The lever can be tipped to either side, and will lay flat on the load.

WITH SPRING

	Price Per Dozen
No. 4200—Standard Size—To take $\frac{3}{8}$ to $\frac{1}{2}$ inch Chain—20 inch Lever. Weight 16 lbs. each.....	\$34.00
No. 4201—Regular Size—To take $\frac{3}{8}$ to $\frac{1}{2}$ inch Chain—22 inch Lever. Weight 17 lbs. each.....	\$40.00
No. 4202—Large Size—To take $\frac{3}{8}$ to $\frac{1}{2}$ inch Chain—26 inch Lever. Weight 28 lbs. each.....	\$54.00
No. 4203—Large Size—To take $\frac{5}{8}$ to $\frac{3}{4}$ inch Chain—30 inch Lever. Weight 32 lbs. each.....	\$60.00

The lever cannot fly up and release the load and is drop forged from carbon steel. All other parts are drop forged from special tough steel. Note the overlapping pins that hold the clevis in fork of lever; when lever is down clevis cannot spring out. These pins are *forged with the lever—not riveted*. Will take up $4\frac{1}{2}$ -inch slack.

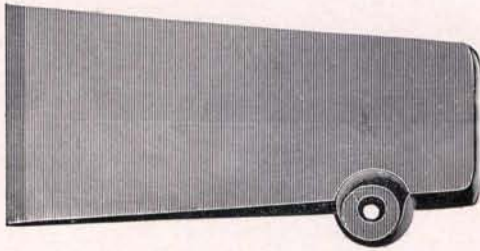

WITHOUT SPRING

	Price Per Dozen
No. 4100—Standard Size—To take $\frac{3}{8}$ to $\frac{1}{2}$ inch Chain—20 inch Lever. Weight 11 lbs. each.....	\$24.00
No. 4101—Regular Size—To take $\frac{3}{8}$ to $\frac{1}{2}$ inch Chain—22 inch Lever. Weight 12 lbs. each.....	\$30.00
No. 4102—Large Size—To take $\frac{3}{8}$ to $\frac{1}{2}$ inch Chain—26 inch Lever. Weight 19 lbs. each.....	\$40.00
No. 4103—Large Size—To take $\frac{5}{8}$ to $\frac{3}{4}$ inch Chain—30 inch Lever. Weight 23 lbs. each.....	\$46.00

(In all details the same, but without spring).

STEEL SAW WEDGES

These wedges are made from high carbon steel, and are all hand forged. They are forged very smooth and with a good finish. We furnish them with links when so ordered.

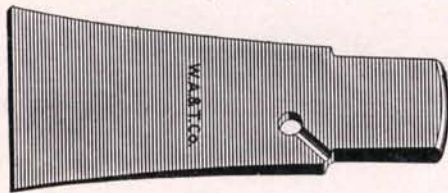

No.	Size	Approx. Wt. (Lbs.) Per Dozen	Price Per Pound
A264	1 pound	12	\$0.16
B264	1½ pounds	18	.16
264	2 pounds	24	.16
265	2½ pounds	30	.16
266	3 pounds	36	.16
267	3½ pounds	42	.16
268	4 pounds	48	.16
269	4½ pounds	54	.16

We will furnish estimates for our customers for any special pattern saw wedges on request.

MICHIGAN SAW WEDGES

In addition to the many other patterns of Saw Wedges we make, we can furnish the wedge as illustrated, in weights as below.

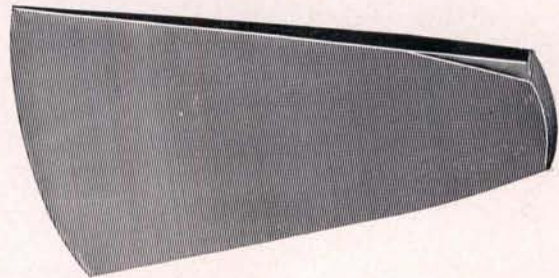

Weight	Price Per Pound
½ pound	\$0.20
¾ pound	.20
1 pound	.16
1½ pound and up	.16

BUCKING WEDGES

Hand forged from best high carbon steel, made in any weight or pattern.

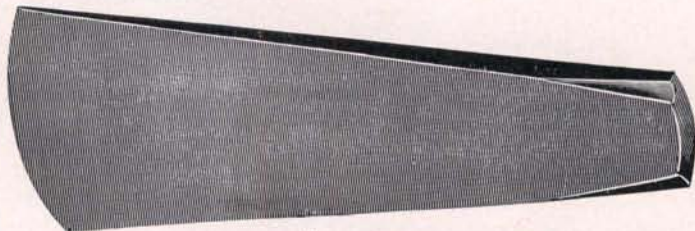

No.	Weight	Price Per Lb.
1329	2 pounds or over	\$0.16

FALLING WEDGES

Hand forged from best high carbon steel, made in any weight or pattern.

No.	Weight	Price Per Lb.
1330	2 pounds or over	\$0.16

SPLITTING WEDGES

Hand forged from best high carbon steel, made in any weight or pattern.

No.	Weight	Price Per Lb.
1331	2 pounds or over	\$0.16

AXE-EYE WOODCHOPPER MAULS

No.	Weight	Price Per Lb.
1332	6, 7, 8, 9 and 10 pounds	\$.18

Note: Always specify weight wanted.

EMERY WHEEL DRESSERS AND CUTTERS

Annual capacity one million sets cutters. Used for trueing, shaping, sharpening, and removing glaze from solid emery wheels running at full speed. Owing to the liability of serious accidents on account of breaking the ordinary cheap cast-iron dresser handle, we will equip all of our dressers with best malleable handles. Our Warren Safety Dresser has no equal.

NO. 90 REGULAR HUNTINGTON PATTERN

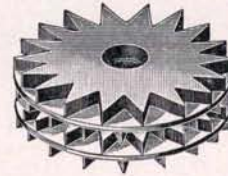

Malleable handle finished in black-baked enamel, has hardened steel bushings and pin, packed one in a box, twenty-five in a case.

Quantity	Price Each
In lots of 1 dozen or less	\$0.70
In lots of 12 to 25	.60
In lots of 25 to 50	.50
In lots of 50 to 100	.48
In lots of 100 to 500	.46
In lots of 500 and over	.44

With extra set of cutters.

MILLED TOOL STEEL CUTTERS

Best milled, made of the best crucible steel, uniformly tempered in oil, packed one hundred sets in a slide-cover wooden box.

Quantity	Price Per Set
In lots of less than 100	\$0.10
In lots of 100 to 500	.08
In lots of 500 to 1000	.07
In lots of 1000 to 3000	.06½
In lots of over 3000	.06

Huntington and Warren Safety Dressers take the same cutter.

NO. 120 WARREN SAFETY PATTERN

Malleable handle finished in vermilion baked enamel, has hardened steel bushings and pin. Packed one in a box, twenty-five in case. The safety feature is in the hood covering the cutters, which effectually prevents accident to the operator in case the pin or cutter wheels are fractured, and also prevents particles of emery from flying into the face and eyes of the operator.

Quantity	Price Each
In lots of 1 dozen or less	\$1.00
In lots of 12 to 25	.86
In lots of 25 to 50	.76
In lots of 50 to 100	.74
In lots of 100 to 500	.72
In lots of 500 and over	.70

With extra set of cutters.

Bushings for Warren Safety or Huntington Dressers \$1.50 per hundred pieces.

Pins for Warren Safety or Huntington Dressers \$1.00 per hundred pieces.

Write for discounts. All dressers packed in individual boxes with an extra set of cutters, and twenty-five complete dressers in a case. Prices are f. o. b. factory.
